

PORTABLE GPS CURRENT INTERRUPTERS

...CRONOS SERIES

100 Amp
External Relay

40 Amp
Internal Relay

- Rugged design .. highly reliable .. easy to operate .. competitively priced
- Precision clock-timing even with an intermittent view of the GPS satellites
- Runs on replaceable D-Cell batteries .. extremely low power consumption for long battery life
- Easy to program via a PC or can “quick select” via a keypad
- Available in 100A and 40A relay models - both relays are rated at 120V AC/DC
- Solid-state (non-polarity dependent) relay - no orientation or polarity concerns
- Only 11.1mV dropped per Amp - both small and large currents can be interrupted
